PROFILE

Results-driven Full Stack Developer with advanced knowledge and hands-on experience in JavaScript, specializing in libraries like React. Proficient in building high-performance and impactful projects using frameworks like Next.js. Skilled in Node.js and Java, leveraging these technologies to develop robust and scalable solutions. Experienced in CI/CD teams and Agile methodologies such as Scrum and Scrumban. Well-versed in collaboration tools like Jira and Slack.

EXPERIENCE

CEO & LEAD TECHNOLOGIST | WANT
2021 - 2023

- Founded and led a startup project called Want
- Utilized cutting-edge technologies, including Next.js, Node.js, Express, and MongoDB, to develop a platform where users can post their desired items, receive offers, and engage in a geospatial system with intelligent user preferences.
- Demonstrated strong leadership and decision-making skills in selecting and working with the best technologies for the project.

FULL-STACK DEVELOPER | BE BOLDER
2023 - Present

- Contributing member of Be Bolder, a software solutions company specializing in the airline industry, working with clients such as WINGO and PLUS ULTRA.
- Collaborating as a Full Stack Developer, leveraging expertise in both frontend and backend development.
- Continuously improving skills and knowledge in software development through practical experience and exposure to innovative technologies.
